SURAJ JAISWAL

Pune, Maharashtra, India | surajjaiswal4222@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science (AI & ML) student with hands-on experience in backend engineering, REST APIs, AI/ML systems, and full-stack application development. Proficient in Python, Java, C++, Flask, FastAPI, Node.js, React, SQL/NoSQL databases, and cloud deployment. Experienced in building production-oriented systems involving generative AI, computer vision, fraud detection, authentication, and distributed processing. Strong foundation in Data Structures, DBMS, Machine Learning, and Software Engineering.

EDUCATION

G. H. Raisoni College of Engineering and Management, Pune 2024 – 2028
B.Tech. in Computer Science Engineering (AI & ML) | ***CGPA: 8.96***

EXPERIENCE

FlyRank AI Jun 2026 – Present
Backend AI Engineer Intern *Pune, India – Remote*

- Working on backend AI engineering tasks involving API development, server-side logic, and AI-powered application workflows.
- Contributing to reliable backend components and integrating AI capabilities into production-oriented systems.

CodeAlpha Mar 2026 – Present
Backend Developer Intern *Remote*

- Developed and worked with RESTful backend services using Python, Flask, and database-driven application logic.
- Implemented backend workflows, debugging, API integration, and problem-solving tasks while improving code reliability and maintainability.

ShadowFox Mar 2026 – Apr 2026
AI/ML Intern *Remote*

- Built computer vision applications using YOLOv8 and OpenCV across data preprocessing, model development, testing, and evaluation.
- Applied machine learning and software engineering practices to develop and improve practical AI solutions.

PROJECTS

YOLO-Driven Automated Attendance System *Python, Flask, YOLOv8, FaceNet, PostgreSQL, OpenCV*

- Built an image-based automated attendance system using **YOLOv8** for person detection and **FaceNet** for face recognition and student identification.
- Developed a **Flask backend** with role-based access for Admin and Teachers, supporting student management, attendance tracking, manual overrides, reports, and analytics.
- Designed database workflows using **PostgreSQL/SQLite** to manage students, users, attendance records, confidence scores, timestamps, and uploaded images.

BidRakshak – GeM Compliance Verification Platform *FastAPI, Next.js, PostgreSQL, OCR, NLP*

- Developed an automated procurement compliance platform to validate vendor documents against **16 compliance checks**, including GST, PAN, MSME, EPFO, ESIC, BIS, and Make in India requirements.
- Built **FastAPI REST APIs**, JWT authentication, role-based access control, audit logging, and a configurable rule engine for compliance verification.
- Integrated **OCR and NLP pipelines** to extract structured information from uploaded documents and generate evidence-backed compliance results.

PolicyPilot – Insurance Policy Analysis Platform *Python, PDF Processing, OCR, NLP*

- Built an insurance document analysis system that extracts and structures important information from uploaded policy PDFs.
- Extracted key attributes including **premium, coverage, waiting periods, room-rent limits, co-pay, deductibles, exclusions, claims, and renewal conditions**.
- Designed structured analysis workflows to simplify insurance policy comparison and highlight important coverage conditions and limitations.

Abhyaas – AI Learning Path Recommender *Next.js, TypeScript, Supabase, Gemini, Recharts*

- Developed an AI-driven learning platform that generates personalized learning paths based on learner goals, existing skills, and diagnostic assessments.
- Implemented **Skill Twin, Skill Graph, Gap Analyzer, AI GPS, adaptive rerouting, and explainable recommendation** features.
- Built dynamic learner profiles and progress visualization using **Next.js, TypeScript, Supabase, Gemini API, and Recharts**.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL
Backend: Flask, FastAPI, Node.js, Express.js, REST APIs

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Vite
AI/ML: YOLOv8, FaceNet, OpenCV, DeepFace, TensorFlow, Keras, Scikit-learn, NumPy, Pandas
Databases: PostgreSQL, MySQL, MongoDB
Cloud/DevOps: AWS, Azure, Docker, Terraform, Vercel, Git, GitHub
Core CS: Data Structures & Algorithms, OOP, DBMS, Machine Learning, Cloud Computing

LEADERSHIP & ADDITIONAL EXPERIENCE

G. H. Raisoni College of Engineering and Management Jan 2026 – Present
Peer Counsellor *Pune, India*

– Support and guide peers through academic and student-related challenges while coordinating with students and faculty.

Messe Global, Laxmi Lawns Aug 2026
Backstage Event Operations Coordinator *Pune, India*

– Handled backstage operations for a live South Indian cultural event attended by approximately **350+ people**, featuring **Shobana (Padma Bhushan awardee)** and artists including **Avial**.
– Coordinated artist movement and backstage logistics to support smooth event execution.
– Worked with event teams to manage time-sensitive backstage activities in a fast-paced live-event environment.

Freelance 2024
Event Coordinator *Pune, India*

– Coordinated college events, teams, vendors, and logistics, demonstrating leadership, communication, and time-management skills.

ADDITIONAL

Interests: Backend Engineering, Artificial Intelligence, Machine Learning, Computer Vision, Distributed Systems
